Byzantine chant is among the most ancient forms of Christian hymnody.

In the Eastern Orthodox Church, all worship services primarily consist of chant and choral singing. During Great Lent, no sacred music is more powerful than the three distinct melodies used in this version of the Lamentations. It is said that the angels praise

God through song. This CD seeks to emulate the angels and encourages listeners to reach with heart, mind, and voice to glorify the Creator – Father, Son, and Holy Spirit.
